INITIAL RELEASE	DESCRIPTION	:\F ¥ !\C \C \C
2022/11/23	DATE	
	TINI	

[Ø.14]

38,00

●LCD display and viewing angle is 12′Clock.

•5 digits display and digit height is 8. 9mm.

Itemp	Parameters
Temperature sensor type PT100	PT100
Housing material	ABS BLACK
Product size	69mm*37mm*17.2mm
Display window size	41mm*17mm
Temperature measuring rang	-20°C-300°C
Waterproof rate	IP67
Weight	126g

•Internal battery power supply: battery type is CR2032 and capacity is 210mAh.

ullet The reminding temperature can be set and the default temperature is 100°C; setting range is -20°C-300°C.

•Temperature in units of Celsius and Fahrenheit is optional. Default unit is Celsius.

ullet The max temperature can be recorded and is resettable. Reset into -20°C.

•Temperature measuring range is -20°C-300°C.

4. Temperature measuring function:

•Overvoltage reminding and undervoltage reminding can be set and setting range is 8-60v

•Display the current clock time from 0-23:59 which can be set; default time is 12:00.

3. Voltage display function:

2. Clock function:

10s(only in the case of external power supply). Temperature range of LCD screen: -10°C-60°C.

•Real-time display of current voltage.

•External power supply: DC 8-60V
